A professional training institute registered as MSME, Govt. Of India, promoted by a group of health care professionals, with 23 years of experience in managing and implementing quality standards in health care industry. The institution is affiliated with National Skill Development Corporation and is certified as four-star category under the SMART (Skill Management and Accreditation of Training centres) scheme for conducting skill development programs including health care sector job roles.

## CERTIFICATE PROGRAM ON QUALITY MANAGEMENT PRACTICES IN MEDICAL LABORATORY (C-QMML)

Organised By :

## About CAPE:

The Co-operative Academy of Professional Education (CAPE-Kerala) is promoted by the Co-operation Department of the Government of Kerala and is an autonomous society under Government of Kerala. The Hon'ble Chief Minister of Kerala is the Chairman of the Society. The Hon'ble Minister for Co-operation is the Vice Chairman of the society. With the mission of producing world class professionals in the fields of engineering, medicine and management, the Co-operative Academy of Professional Education (CAPE) has successfully established in Kerala nine engineering colleges, one business school, a finishing school, and a hospital within a short span of ten years. The overwhelming public response to its educational mission has inspired CAPE to present the first Finishing School, Kerala Institute of Making the Best (KIMB) at Punnapra.

## Kerala Institute of Making the Best (KIMB):

Under the auspice of CAPE, KIMB was organizing skill development training programs to fine tune the professionals in their core areas, who are working in various organisations. Over the past 10 years, KIMB has organized 125 skill development training programs and certified around 4000 participants. KIMB finishing school has successfully provided training program for employees of Consumer-Fed, Engineering college faculty and Board of Directors of co-operative societies in Kerala.

## Backdrop:

The health scenario in the country is changing rapidly due to changing disease patterns, technological developments, and patient-doctor expectations. Medical labs play a very important role in the diagnostic phase of health care. More than 60 to 70 per cent of most important decisions on admission, discharge, and medication are based on lab test results. Considering that labs will play increasing role in medical care and health, quality, reliability, cost effectiveness, and turnaround time of lab services become very important parameters of overall efficiency of health and medical care. Any delay in giving test results or unreliable results could have adverse implications on patients' health. It is, therefore, essential to equip lab managers with a basic understanding of challenges in managing the delivery of quality lab services to patients, desired timely and quality reports to physicians, and ensure adequate financial returns to the labs. In this scenario it is important to study various concepts and standards for modifying the existing work flow system with the help of management techniques and tools in line with quality standards. This program concentrates on developing the knowledge and abilities of lab professionals to run a medical laboratory efficiently and effectively in line with the national and international quality standards. Certified Quality professionals can be lucratively employed in hospital labs & diagnostic centers for implementing, sustaining and improving all kinds of quality/accreditation programs.

## Course Methodology & Assessment:

Duration of the skill development training program is 3 months. The program begins with a compulsory 4 day intensive contact session followed by a written test. A project work of 10 weeks on quality management practices in a medical laboratory to be conducted and the project report should be submitted in a log book, which will be supplied to you at the end of the contact session. Final evaluation is based on the marks scored from the written test and from the evaluation of the completed log book.

## Program Curriculum:

The skill development training program is designed by clinical quality experts to provide a comprehensive coverage of QMS which can be practiced in a clinical laboratory. Some of the important topics in the curriculum are Basic principles and practices of quality management in medical laboratories, Awareness on accreditation standards in medical labs (ISO 15189, NABL, NABH), Quality assurance programs in medical labs, Calibration standards, Meeting the requirements of legal statutes including clinical establishment act, Tools and Techniques for data collection and performance measurement, Management of blood & body fluids, SOP's on transfusion of blood products, Infection control management, Bio-Medical Waste Management & Spillage management etc.

**Intake of students:** 50 students per batch.

**Who can apply:** Doctors, Technical Supervisors, Lab Managers, Lab Technicians, and Quality Executives etc.

**Course Fees:** Rs.7,500/- (including course material & lunch). Group of participants more than 5 no.s and 10 no.s from one institution will get an additional discount of 5% and 10% respectively.
